

## Key Terms for Health and General Pathology

Students are held responsible for this material for the National Board Exam.

Health	Assessing Pain
Disease	Ambulatory
Disability	Anomaly
Homeostasis	Atrophy
Sign	Clinical
Symptom	Congenital
Diagnosis	Degenerative
Acute, Sub-acute, Chronic	Entrainment
Idiopathic	Epidemic
Prognosis	Exacerbation
Etiology	
Syndrome	
Systemic vs Local Contraindication	
Somatic pain	
Visceral pain	
Trauma	
Biorhythms	
Circadian Rhythms	
Ultradian Rhythms	
Seasonal Rhythms	
Cycle of Life - Aging	
Stress	
General Adaptation Syndrome (GAS)	
Communicable Disease	
Pathogenesis of Disease (3 stages)	
Remission	
Pathogenic organisms	
Hyperplasia	
Neoplasm	
Benign vs. Malignant	
Metastasis	
Anaplasia	
Inflammatory response
